

## **How to install the TableEdge™ Coordinate Converter**

*[Note: This install does NOT change anything in your system registry. All it does is copy files to 2 directories and create a shortcut on your desktop. To remove the program simply delete the directories: \@TBLEDGE and \@PMEARCH and delete the shortcut on your desktop.]*

- a)** Download the TableEdge™ Install file. *[This file is a self extracting zip file.]*
- b)** Execute the TableEdge™ Install file. It will place the RunFIRST.EXE and RunLast.EXE in a directory called c:\temp1.
- c)** Execute RunFIRST.exe. Do NOT change the target directory. Click the finish button. *[FYI.. The target directory is c:\@TBLEDGE. RunFIRST is a self extracting executable that places the TableEdge™ program and PDF documentation into the target directory.]*
- d)** Execute the RunLAST.exe. *[This will create a shortcut on your desktop for the TableEdge™ Converter - if your operating system is Windows 2000 or newer. Otherwise it might not create a shortcut on your desktop - in which case you will have to do it manually.]*
- e)** If you need to manually create a shortcut on your desktop here's how:
  - i) Open My Computer, then open the directory c:\@TBLEDGE.
  - ii) Using the right mouse button (not the left!) drag TBLEDGE.EXE to the desktop.
  - iii) Let go of the right mouse button and choose "Create Shortcut Here".

At this point you can start the program by clicking on the shortcut. The first time you start it, you'll need to get an Authorization Code. To get an Authorization code, call Pathfinder Maps at 1-888-447-4745 or 1-613-257-1137. Email them at [info@pathfindermaps.ca](mailto:info@pathfindermaps.ca). Their web address is [www.pathfindermaps.ca](http://www.pathfindermaps.ca)
